Reconfiguration planned for computer science and engineering

A new department, to be operational in fall 1996, will offer a Ph.D. program in computer science and engineering.

In a move that will strengthen the role of computer science and engineering education at Mizzou, the Department of Computer Science and the Computer Engineering Program will be reconfigured into the Department of Computer Science and Engineering. The transition is scheduled to begin this fall and the new department is scheduled to be in operation in fall 1996.

"This step will enable us to draw upon the inherent strengths of both existing departments to maximize common resources and to focus computing instruction and research," said James Thompson, dean of the College of Engineering. "This new departmental reconfiguration is

another example of how MU is becoming a national model among public comprehensive research universities."

The Department of Computer Science and Engineering will be the only one of its kind in the state. It will offer a Ph.D. program in computer science and engineering which will be attractive to students and also to computer-based industries now in Missouri and those considering a relocation to the Midwest. "Another strength will be the department's interdisciplinary work in high-performance computing and computational science and capabilities in hardware, software and computer applications," Thompson said. "Most importantly, we will produce graduates with a

Meet your provost

Ed Sheridan brings distinguished credentials to the job as MU's provost. He says listening is his first assignment.

Ed Sheridan doesn't bring a long list of priorities to his new job as MU's provost. The first order of business, he says, is to listen to faculty and discern what Mizzou's real strengths are.

What Sheridan does bring to MU is a distinguished career as an educator, researcher and administrator. He has published widely on a number of topics and been a national leader in professional organizations.

Sheridan has studied different treatment methods for chronic psychiatric illnesses as well as alternatives to psychiatric hospitalization, such as emergency housing. His research interests include stress and professional burnout, and the training of mental health professionals and drug counselors.

When the AIDS crisis hit Chicago in the mid-1980s, Sheridan was chairman of the psychology division at Northwestern University's medical school. There was little physicians could do to treat AIDS patients in the early years of the epidemic.

"Northwestern was one of the first places to respond," Sheridan says. "Most of the issues really were psychological or legal. People were being fired, or ostracized or losing their insurance."

He signed on as senior consultant for a research effort that studied ways to train health care providers to address AIDS issues. The research group was instrumental in educating children in Chicago's Catholic schools about the disease. "We taught the school teachers so they could teach their students," he says. The group also educated Chicago's 12,000 police officers about AIDS. In studying the effects of the education effort, researchers found a dramatic change in knowledge on the part of Chicago police, Sheridan says, along with a big change in officers' attitudes about homosexuals, drug users and people who were HIV-positive.

Sheridan comes to MU from the University of Central Florida in Orlando, where he was dean of arts and sciences and professor of psychology since 1990. Central Florida,

with 25,000 students, is one of the fastest-growing universities in the country. Although it is only 25 years old, the institution is expected to have 35,000 students by the turn of century. "It's headed to be a very major university," Sheridan says.

Known until about 12 years ago as Florida Technological University, Central Florida has strong engineering and science programs. Its best-known research center is the Center for Research in Electro-Optics and Lasers. A second very successful research center there is the Institute for Simulation and Training.

That institute "thrives because of a big presence of the armed forces," Sheridan says. "With the defense budget getting cut, the military is finding that it can do a lot of things with simulation which saves an extraordinary amount of money. In the College of Arts and Sciences, computer sciences was the strongest department and did a lot of research in virtual reality, a field centrally related to simulation."

One agenda item the new provost stresses is making MU technologically sophisticated in the way it offers education. "I'm convinced we have to do that," Sheridan says. "Technologically sophisticated education is a requirement."

From 1973 to 1990, he was a faculty member at Northwestern University. During his 17-year career there he served on the faculty of the schools of medicine, law and business. For five years prior to that, Sheridan was assistant professor of psychology at the University of Illinois-Chicago.

He holds a bachelor's degree in psychology and philosophy from the University of Windsor in Ontario, Canada; a master's in psychology from the University of Detroit and doctorate in clinical psychology from Loyola University.

For an interview with Sheridan, please turn to page 4. Faculty and staff are invited to meet the provost at a University Forum at 3:30 p.m. Monday, March 27, in Room 208C, Reynolds Alumni Center.

broader computing background than ever before. These graduates will be very attractive to industry."

The existing Department of Computer Science is organized under the College of Arts and Science while the Computer Engineering Program is part of the Department of Electrical and Computer Engineering in the College of Engineering. Reconfiguring the two departments into one will enhance the role of computing on campus, said Larry Clark, dean of Arts and Science. "This linkage will enable the reconfigured department to draw on the comparative advantages of both current units in meeting the needs of our students. Computational science is a discipline that is absolutely essential to our students' success, both while they are with us and after they graduate. This reconfiguration means that we will better prepare students for the technological advances awaiting them in the 1990s and beyond."

The new department will be organized under the College of Engineering but will have ties to the College of Arts and Sciences. For example, a bachelor of arts degree in computer science will continue to be offered through the College of Arts and Science. Two bachelor of science degrees — in computer science and in computer engineering — will be offered through the College of Engineering. The new Ph.D. in computer science and engineering also will be offered through the reconfigured department. Current students will be allowed to complete their degrees under the existing arrangement.

The step can result in additional resources, Thompson added. "Identifying and building on our common strengths will attract new resources, such as additional grants, contract funding and private gifts as well as top-flight faculty and students, Thompson said.

Development of the curriculum and organizational structure of the new department will get under way this fall. The plan will go to Provost Ed Sheridan and Chancellor Charles Kiesler for review before being voted on by the University's Board of Curators.

Provost Ed Sheridan says technological sophistication is a "requirement" in higher education.

JAMES AND VERA OLSON FUND FOR THE PERFORMING ARTS

The James and Vera Olson Fund for the Arts was established by friends of the former UM President and his wife to support the performing arts within the University. Income from the fund is used to support, wholly or in part, an artistic performance on one of the University's four campuses. Selection of performances to be underwritten shall be made by the president of the University or by an officer acting on the president's behalf. The amount of the award is \$15,000.

Proposals must be received by April 10 to be considered for the 1995 competition. Five copies of each proposal should be submitted to the Office of the Vice President for Academic Affairs, Attn: Ms. Sam Kanatzar, 518 Clark Hall.

MEET PROVOST SHERIDAN

Edward P. Sheridan, Mizzou's new provost, will share his impressions of MU and his vision for its future at a meeting of the University Forum Monday, March 27, in Room 208C Reynolds Alumni Center. The event begins with a reception at 3:30 p.m. Sheridan's presentation is at 4 p.m. and a cash bar will follow from 5-6 p.m. The forum is sponsored by the Department of Educational Leadership and Policy Analysis, the American Association of University Professors, the University Club and the Faculty Council.

GENERAL FACULTY MEETING SET FOR APRIL 6

A meeting of the MU faculty has been set for 3:40 p.m., Thursday, April 6, in Columns C, D and E of the Reynolds Alumni Center. Chancellor Charles Kiesler will deliver a state of the University report, followed by a report from the Faculty Council by Chairman Ed Hunvald. A reception will follow immediately in the Great Room.

Top 10 people who would enjoy receiving a Quad calendar

10. Job applicants
9. New faculty members
8. Alumni
7. Visiting faculty
6. Scholars and dignitaries
5. High-school guidance counselors
4. Guest speakers
3. Visitors from other countries
2. Award-winning faculty and staff
1. Legislators

In honor of Francis Quadrangle's centennial anniversary, the campus kicked off its yearlong celebration March 3. Now is the perfect time to give someone a calendar that captures the Quadrangle at its best, with pictures taken from all angles and all seasons of the year, as well as a section devoted to nostalgia.

Printed on high quality glossy paper, it is the perfect gift for any occasion and will be valuable for years to come.

Mention this ad and receive a 10 percent discount.

 Quantity _____ Grand total _____

IDO (\$7.99 each) Personal check (\$8.55) Off-campus shipping and handling (\$1.50 for first calendar, \$3 for second, and 25 cents for each additional calendar.) Please mail to Quad Calendar, 407 Reynolds Center, Columbia, Mo. 65211, or call (314) 882-7357.

Faculty Council considers new admissions standards

MU's Faculty Council is evaluating a proposed change in freshman admissions standards. Under the proposal, MU admissions officers would continue to weigh college entrance test scores, but would link those scores to grades in core high school courses, rather than class standing.

High school grades will be one of the factors used to calculate predicted freshman-year GPA. Other factors are high school coursework and scores on college entrance exams. A predicted GPA of 2.0 or better will be required for entering freshman.

Currently, freshmen are admitted to MU based on their ACT composite scores and class rank. The issue has been under discussion by faculty and academic administrators for some time, said Admissions Director Gary Smith. The new standards will take effect in fall 1996.

The proposed change will provide a number of benefits, Smith added. The new policy will attract students who can succeed at MU and will provide more flexibility for enrollment management efforts. In addition, the proposal meets admissions guidelines established by the state Coordinating Board for Higher Education. Those state guidelines also go into effect fall of 1996.

Council Chairman Ed Hunvald said the new admissions standards will be taken up again at the council's March 30 meeting.

Attending his first Faculty Council meeting as MU's new provost, Ed Sheridan noted that he already has met several times with the council's executive committee. "They were productive meetings and we discussed a wide variety of issues," the provost said. "At this point I'm trying very hard to listen, to get a sense of what the issues are. It certainly is my intention to work very closely with you."

Betty Winfield, professor of journalism, asked the provost if there was a plan to take away tuition waivers for graduate assistants. "There is not a plan to take away tuition waivers for teaching assistants and research assistants," Sheridan replied.

However, he said there is a discussion of when such waivers are appropriate. Some colleges, he said, rigorously document the work their graduate students perform. In other colleges there are a number of graduate students who take only one or two courses each semester without adequate evidence that they are doing research or teaching.

"For those who seem to be dabbling in a degree, there's not going to be a lot of support for that," Sheridan said. "The issue is, we have let it get out of control. We are talking very, very large amounts of money."

Several council members raised concerns that reducing fee waivers could hamper ef-

Proposed first-time admission standard

The following draft admission standard is under discussion by the Faculty Council:

Freshmen will be admitted based on a predicted freshman-year GPA of 2.00 or greater. The predicted GPA is calculated using the relationship of the following academic factors: high school courses, grades in core courses, and ACT/SAT scores.

According to MU Admissions:

■ 89 percent of first-time college students enrolling in fall 1993 and fall 1994 met the predicted 2.0 GPA standard.

■ 94 percent of the first-time college students enrolling in fall 1993 and fall 1994 met the minimum for "selective" universities — combined class rank and test score percentile of 120, or an ACT composite score of 24 or greater, which the state Coordinating Board for Higher Education will require beginning in 1996. The CBHE has a provision which exempts 10 percent of students from the standard.

forts to recruit top graduate students. Sheridan agreed that the waivers can be an effective recruiting tool for graduate students.

"There's no way we're going to get in the way of that. We intend to remain competitive," Sheridan said. He added that consideration will be given to departments that can make a case they will be harmed by a reduction in fee waivers.

"This is not a punitive action," Sheridan said. "It is to deal with abuses. Our only goal is to recapture that money, because it can be used better in graduate education."

In other action, the Faculty Council:

■ discussed whether capping student fees at 14 or 15 credit hours each semester would encourage students to take additional courses. Smith told the council that at one time students paid for a maximum of 12 hours a semester. "As the University struggled with funding issues in the 1980s, the cap went to 14 hours," Smith said. Students currently are charged for each credit hour they enroll.

"Does it have a detrimental effect on students getting out of here in four years?" asked Deborah Pearsall, associate professor of anthropology.

Several council members suggested that a fee cap would give students an opportunity to try classes they otherwise might not take. "I believe our more serious students would be helped by doing this," said Pat Plummer, professor of chemistry and physics.

Alzheimer's Disease

The University of Missouri- School of Medicine is conducting a study of new investigational medication for the treatment of Alzheimer's Disease.

Qualifying participants need to meet the following criteria:

- Age-40 years and above
- Mild to moderate Alzheimer's disease
- Living at home with a caregiver
- Have a caregiver who is able to participate in the study
- Be in general good health
- Minimum 1 year history of Alzheimer's Disease Symptoms

If you are interested in participating or would like more information about this study, please call

(314) 882-8040

SHRINE CIRCUS HEADS FOR HEARNES

The Shrine Circus, with its animals, acrobats and clowns, will perform at the Hearnes Center at 7 p.m. Friday, March 31, and again at 2 p.m. and 7 p.m. Saturday, April 1. The circus has been entertaining children and adults across the country and is making its first trip to the Hearnes Center.

Reserved and general admission tickets are priced from \$8 to \$10 for adults and \$4 to \$6 for children. They are available at the Hearnes Center box office and at all Tickets Now locations. Or you may order your tickets by phone by calling 1-800-CAT-PAWS.

A portion of the proceeds benefit Shriner's Hospitals and other programs for children.

FULBRIGHT APPLICATIONS AVAILABLE

The 1996-97 competition for Fulbright Scholar lecturing or research awards is open. The deadline is Aug. 1. Application kits are available at the Office of Research, 205 Jesse Hall. Or e-mail: requests@research.missouri.edu

Primary care program among nation's best

U.S. News & World Report ranks MU's School of Medicine as 10th in the nation among schools oriented toward primary care.

In addition, the school's family medicine program, which traditionally has a high national profile, was named No. 2 in the country in a survey to determine the top five medical schools in eight different medical specialties. MU placed second only to the University of Washington in the family medicine category and was the only Big Eight/Big Ten school listed.

The rankings were published in the March 20 issue of the magazine, which includes an annual section on "America's Best Graduate Schools."

"We have put a special effort into building up our rural and primary health care programs in recent years," said Lester R. Bryant, dean of the medical school since

1989. "It's exciting for the Health Sciences Center to gain this sort of national recognition as a result."

The school's involvement in rural primary care has intensified in recent months. Last fall, the Health Sciences Center received two major federal grants totaling nearly \$3 million — one to set up an Area Health Education Center for 22 mid-Missouri counties and another to establish a telemedicine network so rural patients won't have to leave their hometowns for consultations with specialists.

MU is the highest-ranked Big Eight medical school in the survey of the 62 programs nationwide classified as having a focus on primary care. Primary care includes the specialties of family medicine, general internal medicine and general pediatrics, all of which are in short supply in many areas of the country. The University of Colorado, at 13th, is the only other Big Eight school ranked. Big Ten schools Michigan State and Iowa rank third and fifth respectively. The University of Washington stands at No. 1.

This is MU's second appearance in the survey, now in its sixth year. MU ranked in the second half of the top 20 comprehensive

schools in the 1993 guide.

U.S. News divides the nation's 125 medical schools into two categories, research and primary care. The rankings are based on data provided by the schools and by a survey of deans and senior faculty members. Criteria are student selectivity, faculty-to-student ratio, reputation, research activity and rate of graduates going into primary-care residency training programs.

Among schools with a research orientation, Washington University in St. Louis ranks fifth in the nation. No other Missouri or Kansas medical schools are listed in either the research or primary care category.

"Supplying the nation with enough primary care physicians to meet future demand is a national priority and we are pleased to be recognized for our leadership in this area," said Jack Colwill, chairman of the Department of Family and Community Medicine.

MIZZOU WEEKLY

Vol. 16

No. 24

A publication of the University of Missouri-Columbia faculty and staff, published every Thursday during the academic year and twice a month during the summer by Publications and Alumni Communication, a department of University Affairs, 407 Reynolds Alumni and Visitor Center, 882-7357. News deadline is noon Thursday the week before publication. Annual subscriptions are available for \$20.

RETIREES ASSOCIATION

MURA's personal finance committee will meet twice in April. On April 3, Bob Duncan of the local Social Security office will discuss current Social Security programs, including SSI. On April 17, the group will host an open meeting to discuss any personal finance problems members wish to share. The personal finance committee meets at 10 a.m. in Room S207 of the Memorial Union.

A new elderhostel interest group is being formed. Anyone who wants to learn about

elderhostel or would enjoy hearing members discuss their experiences with the program is welcome to attend. The group will meet at 10 a.m. April 24 in Room S203 of the Memorial Union.

Several retirees wish to explore the possibility of an exercise/stretching class. If you are interested, please call Eva de Chazal, 442-2668, or Hazel Breitenbach, 442-2521.

The annual MURA picnic will be May 24. Watch this space for details. If you have news or notes for this column, please contact Ann Gowans, 449-1311, or Bob Breitenbach, 442-2521.

MURA activities are open to all faculty and staff MURA members.

Provost Ed Sheridan discusses his initial impressions of Mizzou and the challenges he sees for its future.

Q. Do you bring a list of priorities to your new position as provost?

A. The first priority for any provost is to be a strong academic leader and work closely with the deans and department chairs. That gives faculty a sense that the academic life of the University is its very first value and its most important mission.

I think it's important, especially when you're new to the institution, to listen to the faculty and see what the real strengths of this particular university are and what its resources are. I don't think you should come in with too many predispositions because they might not be that applicable here. But there's no question that academic leadership is the primary function of this office.

Q. Here at MU, one issue on the front burner is an effort to rebuild the general education program. At Central Florida you were chairman of the general education program. Do you have any thoughts about the process and its importance?

A. It's important at any university to review the general education program about every 10 years. You should see if it's really meeting the needs of the students and if it's achieving the goals that were set when faculty put it into place.

What has happened at Missouri is the faculty has developed one of the most ambitious and sophisticated general education programs in the country. It would be hard to find other universities that have as complex and thoughtful a general education architecture as exists here. I'm extremely impressed; it really is a leading program.

I think it has one shortcoming right now. We have not yet carefully enough interwoven a guarantee that students in general education will have appropriate exposure to the cultural diversity that exists in modern education.

As you know, there is some controversy about this. Some people think we should have a separate course on cultural diversity. Others feel that we should diffuse cultural diversity into all kinds of courses. It's obvious that the latter is a much better way to do it. It should be an experience you have every day in the classroom in any kind of education where cultural diversity is relevant, and it's relevant in most disciplines.

Q. The General Education Architecture at MU was worked out by a group of faculty over a number of years. Do you feel that faculty participation makes the program even stronger?

A. I think that is the only way you can

ever do this. Any general education program that doesn't come from the faculty will never work. It makes no sense to do it any other way. If you're going to develop a general education program, the faculty should develop it because they're the ones who are going to carry it out.

Q. Is it more difficult to get a general education program up and running at a comprehensive research university such as MU, compared to a small liberal arts college?

A. Well, it's more complex. On the other hand, I think we can do it better here at MU. We have more resources; we have more professors. And our people don't just teach in the fields where general education exists, they are actually doing the research and writing the books that explore the foundations of general education. I expect our general education program to be richer than you would find in a liberal arts college. I think it's fair to say we are offering one of the strongest undergraduate programs in the country right now.

Q. In the last year, MU has had enormous success recruiting minority freshmen. Do you think the efforts at multiculturalism here are on target?

A. I think you have two separate issues. I'm very impressed with the effort to recruit minority students onto campus. I'm even more impressed with the way in which we have developed a retention program so these students have a real chance not only to enter the University, but to complete their education.

Not only has there been a dramatic increase in the number of minority students at Missouri, but there is a plan for these students to finish their education. And the students are working very hard.

However, having a lot of minority students doesn't really make for multiculturalism in the curriculum. It comes from having scholars who think multiculturally and teach those experiences

in their courses. It doesn't make a lot of difference what ethnic background they come from, it's that they have those values and teach those values in the classroom. So that's a separate issue.

In a world that's become so international you want your students to experience a sense of internationalism. You want them to hear different languages being spoken. You want them to be exposed to art and music from different places, to have a sense that there's a bigger world that they didn't experience before. I think we're making good progress in doing that.

Q. Another priority at MU is a renewed emphasis on undergraduate education. There seems to be a public perception that at large research universities undergraduates are relegated to teaching assistants. That was certainly the perception in a recent "60 Minutes" program that took universities to task. Do you think it's a valid point?

A. That program on "60 Minutes" was tremendously biased; I thought they were out of touch. The program actually would have been more relevant about 15 years ago. It's certainly not relevant on this campus. On this campus you have departments that take great pride in having the strongest professors teaching the introductory courses. It

Q. What are your thoughts on increasing external funding for the research that MU performs?

A. The University of Missouri already is a fine research university. It's a Carnegie Research 1 university. It's an AAU university. But we have not taken advantage, I think, of all the strengths we have, both in terms of being in this state and being located where we are. We have some superb professional schools, we have very strong science and engineering programs, we have leading research centers, and we need to move forward in a thoughtful way to increasing our efforts to have the excellent research we do

be funded by external sources.

External funding helps bring excitement to the University, to develop stronger graduate programs and attract a stronger faculty. It enables the University to do more because we're not just putting state dollars into research but we have substantial external money.

As you know, the chancellor has said he wants us to double our research funding in the next five years and I think that's a very appropriate goal. Certainly, part of my mission, and the expectation of me, is that I'm going to be

very active in trying to see that happens.

Q. Another issue under discussion at MU is the storage of certain library materials as a way to ease overcrowding. Is that discussion on track?

A. I think this is a matter of communication. At Central Florida, I chaired the library advisory committee and I think I was perceived as a very strong advocate for the library. The concern expressed most often by scholars in the humanities here at MU is that they could lose access to important works that they need for their scholarship. That simply will not happen. For people in the humanities, the library is their laboratory and my goal is to protect their laboratory.

The truth is there are many, many volumes in our library in all kinds of fields that nobody uses. We simply don't have unlimited space, so the storage facility is a necessity. We will move toward it, but we will move toward it working with the faculty. The threat that we might remove something that someone really needs is an unfounded concern. We will not take anything out of the library that faculty have said they must have. But we have to take some volumes out of the library.

We also have to plan for the fact that automation is going to change the way we use the library. We have to prepare ourselves for that kind of change, which will affect the sciences much more than it's going to affect the humanities. We will have to make distinctions between disciplines when we have a remote storage facility; we're not going to treat everybody the same. I think everybody will come out of this well and I don't think it's a threat to the scholarly enterprise of the University.

is not true that we are filling all these large classes with teaching assistants who give all the lectures. In their first year, our students have lots of exposure to professors.

At some universities I think at one time there was a de-emphasis on senior professors teaching undergraduates. That's pretty much gone. It's certainly gone here. Here at MU, I think every department will tell you that the majority of professors are teaching undergraduates and many are teaching the large undergraduate classes.

Faculty philosophically believe you should offer very strong professors to undergraduate students so that students study with the masters. That's what parents expect when their children go to the university, that they will be exposed to these extraordinarily talented people. In the short time that I've been here, I hear that value being promoted by faculty; they really do believe in it.

Campus Computing

Short Courses

The following non-credit short courses are free of charge and open to MU faculty, staff and graduate students unless otherwise noted. Participants may be enrolled in no more than two courses at one time. Registration is required and is done on a first-come, first-served basis. To enroll, please call 882-2000. NOTE: When an ID is required for a class, participants should obtain the ID prior to registering for that class (call the Help Desk at 882-5000 for ID information). Additional courses will be advertised in future issues of the *Mizzou Weekly*.

FOUNDATION OF COMPUTERS

3: MARCH 31 AND APRIL 7 (FRIDAY), 9:00 AM - NOON

4: APRIL 3 AND 10 (MONDAY), 9:00 AM - NOON

Through lecture and hands-on exercises, the student will learn the fundamentals in both IBM and Macintosh platforms of computer hardware, what they do and how they function; different categories of software applications; terminology and basic computer manipulation; and disk and drive preparation for file management. The student will learn to interpret computer advertising and jargon to make educated decisions about purchasing and upgrading. The course will also include a discussion of how computers are linked together in networks through which they can share resources and information. The course concludes with a complete presentation of the University's computing facilities, training and where to get help.

INTRODUCTION TO RICEMAIL

1: MARCH 30 (THURSDAY), 9:00 AM - NOON

2: APRIL 6 (THURSDAY), 1:00 - 4:00 PM

RiceMail is the software that makes it possible for you to communicate by email on the MIZZOU1 mainframe computer. In this course you'll learn how to compose, edit and spell-check email notes and send them to an individual or group of people. You'll also learn to organize your email by sorting it into notebooks, and time-saving methods such as using nicknames in place of full email addresses. Prerequisite(s): Foundation of Computers course (or basic experience with a microcomputer). A MIZZOU1 ID is required prior to registering for the class.

CC:MAIL FOR DOS AND WINDOWS (NETWORK-BASED)

2: APRIL 10

cc:Mail for DOS: cc:Mail training for the DOS and Windows platforms is available through a network-based software program. Interested users can register for a hands-on, self-paced tutorial which they can access from their own computers. Topics covered include starting cc:Mail; reading a note; reading bulletin boards; addressing and sending messages; using the cc:Mail text editor; attaching items; importing text; using the spell checker and graphics editor; replying to and forwarding messages; and archiving and printing messages. A password will be issued to participants which gives them access to this self-paced tutorial for one (1) week from the start date. Prerequisite(s): A cc:Mail ID is required prior to registering for the class.

CC:MAIL FOR THE MACINTOSH

MARCH 29 (WEDNESDAY), 1:30 - 4:30 PM

This hands-on class covers the basics of using cc:Mail on a campus Macintosh network. Topics covered are email etiquette, how to send and receive mail and some of the available options. Prerequisite(s): A cc:Mail ID is required prior to the beginning of the class; the Introduction to the Macintosh short course or basic knowledge of Macintosh operation.

LECTURE: INTRODUCTION TO DIAL-UP CONNECTIONS—PROCOMM

MARCH 30 (THURSDAY), 9:00 AM - NOON

This lecture/discussion will overview basic concepts and the hardware and software needed to access the University computing

resources using a modem from home or office. It will not cover SLIP connections. Hands-on instruction will not be offered. Prerequisite(s): None. A minimum enrollment of five is required for this class.

FOCUS ON FACULTY COURSES

Computers are playing an increasing role in academics. In response to the growth in the use of computing resources at MU, Campus Computing has added the following seminars for faculty members to our regular short course series. *Additional Focus on Faculty courses will be advertised in the Mizzou Weekly.*

INTRODUCTION TO SHOWME/PINEMAIL

MARCH 31 (FRIDAY), 1:30 - 4:30 PM

This hands-on class will introduce you to "logging on," manipulating electronic mail (email) and email etiquette on the academic Unix computer system, SHOWME. Prerequisites: A SHOWME ID is required prior to attending the class.

Meet Deborah Walker, DNSc, CNM, (center) and Lisa Roberts, MS, CNM, (right) certified nurse-midwives at University Hospital. They are shown here with mom Samantha Atkinson-Ghio and baby R.S. Kellan Ghio from Columbia.

Announcing certified nurse-midwives at University Hospital

For women who want an alternative delivery option in the security of a hospital.

University Hospital and Clinics and the MU Sinclair School of Nursing announce the addition of certified nurse-midwives who can deliver your baby at University Hospital.

Certified nurse-midwives are registered nurses educated in both nursing and midwifery. They guide healthy women safely through pregnancy, labor and delivery. Should complications develop, they will consult with obstetricians and neonatologists at University Hospital who are available 24 hours a day.

Our certified nurse-midwives concentrate on making the birth of your baby the personal experience it's meant to be — in a caring, comfortable environment. They stay with you while you're in labor as much or as little as you want. And after the baby is born, they provide appropriate follow-up care.

Certified nurse-midwives also provide other well-woman services such as family planning.

Nurse-midwifery care is covered by most private insurance carriers, managed care programs, Medicare and Medicaid.

FOR THE RECORD

THE MISSOURI SYMPOSIUM ON RESEARCH AND EDUCATIONAL POLICY, March 30 and 31, is sponsored by the Center for Research in Social Behavior, the Graduate School, the departments of Psychology and Sociology, the College of Education, the College of Arts and Science, Extension Teaching, Women Studies Program, and the MU Lectures Committee. *Mizzou Weekly* omitted the College of Education — and incorrectly included the Danforth Foundation — in a list of sponsors published March 9.

THE SHOJI TABUCHI CONCERT, originally scheduled for March 14 at the Hearnes Center, has been rescheduled for Sunday, April 23, at The Shoji Tabuchi Theatre in Branson.

Purchasers of Columbia tickets who wish to attend the Branson performance should refund their Columbia tickets and purchase Branson tickets before April 1 to ensure seating. Tickets purchased through the Hearnes Center for the March 14 show will be refunded upon request at the point of sale. Any ticket ordered by phone or mail may be returned by mail for a full refund. If a refund is not requested by April 30, excess proceeds will go to the Kiwanis Foundation to support pediatric cardiology at Children's Hospital.

For ticket information and reservations for the new Shoji Tabuchi Children's Hospital Benefit, call the Shoji Tabuchi Theatre Box Office at (417) 334-7469. For information about a refund, call 1-800-CAT-PAWS.

LEARN ABOUT ARTHRITIS AND EXERCISE at the Arthritis Foundation's Arthritis Self-Help Course scheduled to

begin at 10 a.m., Monday, March 27, at Columbia Mall. The two-hour class will end at noon. Cost of the four-week course is \$10. Call 882-8097 or 882-6565 for more information.

"CLASSROOMS OF THE FUTURE" is the subject of a public hearing at 3:40 p.m., Monday, April 10, in Room 25 of the General Services Building (next to the Hearnes Center). The hearing, which coincides with a meeting of the MU planning committee for facilities and grounds, will be chaired by Bob Swanson, architectural projects manager with the office of Planning, Design and Construction.

UNIVERSITY PHARMACY, in the lobby of University Hospital and Clinics, has expanded its hours to include weekends. The pharmacy now is open 10 a.m. to 4 p.m. Saturday and Sunday and from 8:30 a.m. to 6:30 p.m. weekdays.

THE COORDINATING BOARD FOR HIGHER EDUCATION has announced the Eisenhower grant competitions: Eisenhower Mathematics and Science Program (Cycle XII) and the Eisenhower Professional Development Program (Cycle XIII). Full details are available on the Office of Research World Wide Web Home Page; address: <http://sage.research.missouri.edu>

Staff Recognition Week '95

STAFF — STRENGTH IN VARIETY

April 10-14

A week of programs and activities for staff in recognition of service to the University.

Programs are free, and ALL STAFF ARE ENCOURAGED TO PARTICIPATE.

presented by

Staff Advisory Council
WORKING FOR YOU

T U E S D A Y, A P R I L 1 1

Fashion Show

Noon to 1 p.m.
Memorial Union Auditorium (South Building, Wrench Auditorium)
Come to a fashion show that will again feature attractive, yet affordable styles from many local business. You'll see a "variety" of fashions for both men and women with your co-workers as the models! You are encouraged to bring a can of non-perishable food — these items to be distributed through the Columbia Community Food Bank. Help us to show Columbia the support they have from MU Staff.

W E D N E S D A Y, A P R I L 1 2

Variety Show

Noon to 1 p.m.
Memorial Union Auditorium (South Building, Wrench Auditorium)
Musicians and entertainers of all kinds have gotten their acts together and will take to the stage to entertain their fellow staff members. Come join us to see the "variety" of talent throughout MU. A donation of a can food item is encouraged. These items will be distributed through the Columbia Community Food Bank.

T H U R S D A Y, A P R I L 1 3

Health & Wellness Fair

11 a.m. to 2 p.m.
Student Recreation Center (Brewer/Rothwell Gymnasium)
Come and learn all about the services and health activities available to the staff. There will be informational booths, aerobic demonstrations (you are invited to participate!) and free health screenings. As an added bonus, staff members will have FREE use of the facility and equipment for the week of April 10 - 16. Take time out for yourself! You will feel better!!

F R I D A Y, A P R I L 1 4

Cultural Diversity in the Workplace

1) 9:30 to 11:30 a.m. 2) 1:30 to 3:30 p.m.
Stotler Lounge Stotler Lounge
Memorial Union North Memorial Union North
An "intervention theater" production that approached diversity with a respect for individuals and differences in the framework of the workplace. Seating limited to 200, call 882-8601 to register. Enrollment is on a first-come, first served basis.

Diversity Workshop

Noon to 1 p.m.
Room 701 Ellis Fischel
Focus of this program is to create an awareness of diversity issues. Discuss how difference among staff members can lead to stronger teams.

O T H E R A C T I V I T I E S

Food Drive/Collection

Please bring your non-perishable can food items to the Fashion Show or the Variety Show. Additional items needed are shampoos, detergents, soaps, toilet paper, paper towels, toothbrushes and toothpaste. Items will be distributed to local organizations that assist persons in need throughout the Columbia area. This is an opportunity to show our "strength" and support to the Columbia Community.

Staff Recognition Ceremonies

Monday, April 10
1:30 to 3:30 p.m.
Jesse Hall Auditorium

Chancellor Charles Kiesler will present the four \$1,000 Staff Recognition Awards to one member of each subgroup: Administrative/Professional, Crafts/Maintenance, Secretarial/Clerical and Technical/Paraprofessional. The Mick Deaver and the Barbara S. Uehling Awards of \$500 also will be presented. Staff with 20, 25, 30 and 35 years of service will receive individual certificates. Staff with 5, 10 or 15 years of service to the University will be recognized. Refreshments will be served following the ceremony.

CALENDAR

Send calendar items in Campus Mail to *Mizzou Weekly Calendar*, 407 Reynolds Center, by noon Thursday the week before publication. Events are free and open to the public unless otherwise noted.

"Elisabeth Vigée-Lebrun, Marie-Antoinette and the Aesthetics of Queenship"

has been cancelled

due to Professor Mary D. Sheriff's illness

10 a.m. to 2 p.m.
Saturday March 25
University Hospital's
Main Lobby

Join us for the Fifth Annual Kids' Day, sponsored by Children's Hospital at University Hospital and Clinics and KOMU-TV 8. This free event is a day of health and safety activities for kids ages 2 to 10. Activities include:

Screenings — Free vision, asthma, hearing and blood pressure screenings, and growth assessments.

Tours — SameDay Surgery operating room, helicopter, ambulance, fire engine trucks and patrol car.

Mini News Set — Bring a videotape, and KOMU-TV 8 will videotape your child reading the news or just having fun in front of the camera with KOMU-TV 8 personalities.

Activities — Rescue choking; nutrition hopscotch; sun safety; operating room dress up (free surgical attire); activities to help children prepare for a visit with the doctor; wheelchair obstacle course; Wheel of Health game; Boone County National Bank coloring activity; Children's Miracle Network duck pond; Columbia Fire Department Safety City; other safety booths; nutrition and dental health information; and safe handling of animals.

Center Stage — Kids on the Block puppet show will perform at 10:15 a.m.; fire safety demonstration at 11 a.m.; Gus and Goldie, the water safety fish, at noon; and Ronald McDonald® at 1 p.m.

Low-cost bicycle helmets — Purchase an ANSI, Snell or ASTM-approved bicycle helmet for your child for just \$15.

Animal Health Fair — After visiting Kids' Day, take a free shuttle bus to the University of Missouri College of Veterinary Medicine's Open House and Animal Health Fair. Children can enjoy viewing the cow with a "window in its stomach," military and guide dog demonstrations, a petting zoo, wagon rides, horse shoeing demonstrations, dairy milking, birds of prey exhibits, exotic animals and more.

This event will be held rain or shine. Free parking in hospital garage or surrounding lots. Kids will enjoy appearances by special characters, door prizes and refreshments. And each child will receive a pair of sunglasses (while supplies last). All children must be accompanied by an adult. For more information, call 882-6565.

Artists" will be on display through March 26.

■ "Finds from Jewish Ossuary Tombs" will be on display through April 2. The museum, in Pickard Hall, is open from 9 a.m.-5 p.m. Tuesday through Friday and noon-5 p.m. Saturday and Sunday.

ROGERS GALLERY: The gallery, located in 148 Stanley Hall, is open from 8:00 a.m.-4:00 p.m. weekdays.

STATE HISTORICAL SOCIETY:

■ "Edward S. Curtis: The North American Indian" will be on display in the gallery through April 15.

■ "Carl Gentry (1888-1976) Oils and Watercolors" will be on display in the corridor through April 15.

■ "Decades: 1885-1965 Editorial Cartoons" are also on display in the corridor.

The gallery is open 8:30 a.m.-4 p.m. weekdays. The corridors are open from 8 a.m.-4:30 p.m. weekdays and 9 a.m.-4:30 p.m. Saturday.

UNIVERSITY HOSPITAL MAIN LOBBY

and **ELLIS FISCHER CANCER CENTER LOBBY:** The works of Don Duncan, Dale Fisher, Mike French, Shirley Gunderson, Sandi Smith and Leslie Utterback will be on display through March 31 as part of the Art for Life Program.

Films

Thursday, March 23
