

MU's reputation is solid with legislators

A rea legislators brought an upbeat message to Mizzou last weekend. Missouri's colleges and universities — especially MU — enjoy a solid reputation in the state Capitol. Because of that, they say, Gov. Mel Carnahan's recommended budget increase for higher education should face few obstacles in the General Assembly.

Six mid-Missouri lawmakers took part in a Jan. 27 panel discussion sponsored by the MU Alumni Association's legislative information network committee, also known as LINC. The group included two legislators recently elected to key leadership positions in the House of Representatives: Speaker of the House Steve Gaw, D-Moberly; and Gracia Backer, D-New Bloomfield, the

new majority floor leader. Other participants were Rep. Tim Harlan, D-Columbia; Sen. Joe Moseley, D-Columbia; Rep. Ted Farnen, D-Mexico; and Rep. Ken Jacob, D-Columbia.

Chancellor Charles Kiesler commended the panel members for their support of higher education. "We are fortunate to have the quality of representation that we have in the legislature," the chancellor said. "Many on this panel are alumni of MU and all of them are friends. They are smart, courageous, dedicated advocates of higher education and we appreciate that very much.

"These are exciting times for us. I think we are a unique institution in the United States right now. We're on the move during times when everybody else is still arguing and wondering why the future doesn't look brighter than it does. Our enrollment is up and that is a sign that we're being successful in getting our message out around the state."

Speaker Gaw recalled that a few years back some higher education supporters questioned Carnahan's emphasis on elementary and secondary education. "I think those of us who have been around the governor knew that higher education wouldn't be far behind. I think he is dedicated to public education," Gaw said. See legislators page 11

Talking about teaching

n his two decades as an educator, James Groccia has worked with both faculty and students to enhance teaching and learning on college campuses — experience that will now benefit MU.

Groccia is the new director of Mizzou's Program for Excellence in Teaching. Recognized as one of the best in the nation, the program provides support services for instructional staff to develop and enhance their teaching skills. Teaching workshops, resource materials and individual consultations are just a few of the services provided throughout the year.

Groccia comes to MU from Worcester (Mass.) Polytechnic Institute, where he was a faculty member and director of the institute's Center for Curricular Innovation.

One of his major interests is getting students more involved in their learning.

Large lecture classes provide a special challenge for that goal. At Worcester, Groccia and a colleague researched ways to make the teaching and learning process more effective in large lecture classes. As part of that research, they helped revise many of the institute's introductory math, science and engineering courses.

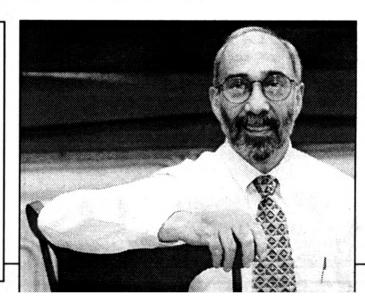

"We showed that by doing a few things — using cooperative learning, project-based learning and a network of undergraduate students as peer learning assistants — we were able to teach classes of 175 to 200 students in a way that produced effective student learning, higher student evaluations and other indices of quality," Groccia says.

One of his goals at MU is to encourage the campus community to maximize the teaching and learning resources already available. Groccia has a few other goals as well.

"My first priority is to learn as much as I can about the University. I want to get faculty and student input on what their perceptions are now of the Program See excellence page 12

MU's 1996 TEACHING RENEWAL CONFERENCE will feature sessions on more than 30 teaching-related issues and provides an annual oppportunity for collegial sharing and professional growth.

"The conference is a major activity where faculty, instructors and TAs come together for two days to discuss teaching and learning issues," says James Groccia, director of the Program for Excellence in Teaching. "In addition to invited speakers, MU instructors share with their colleagues teaching approaches that have worked for them." Conference sessions will be held from 8:30 a.m. to 4 p.m. Feb. 29 and March 1.

James Groccia, new director of the Program for Excellence in Teaching, would like the program to provide a "haven" where MU instructors can come together to talk about teaching and learning.

OPEN AND SHUT CASE

Beginning today, motorists can take Maryland Avenue straight from Stadium Boulevard all the way to the heart of campus without feeling like they're dodging and weaving through an obstacle course. The road was straightened and upgraded as part of the construction of the Marvland Avenue parking garage.

Now for the flip side. Also beginning today, Hitt Street will be closed to through traffic between Lake Street and Hospital Drive so construction crews can continue work on the new Ambulatory Care Center. That section of Hitt will be closed for the remainder of the semester.

STUDENT FEE FORUM

An open forum will be held from 3 to 5 p.m. Feb. 5 in Townsend Hall to discuss fees at the University of Missouri and the work of the Student Fee Task Force. The panel was appointed by UM System President George Russell; Chancellor Charles Kiesler is the task force chairman.

The task force was asked to develop recommendations for a UM fee policy to replace the current

five-year plan, which is entering its final year. Under the five-year plan, student fees have risen at the rate of inflation plus \$100 each semester. Any new fee policy must be approved by the Board of Curators. An electronic copy of the task force report may be accessed at the following web address: <http://www.system.missouri.edu/ure Vmain/second/presi/wgarcom.htm>

SPEAK UP ON VIOLENCE

Take part in the national discussion on violence. Preventing violence in our society will be the focus of two live video conferences and a public

forum sponsored by the School of Social Work. The events are part of a week-long national "teach-in" organized by the National Association of Social Workers. During the week, teachers across the country are urged to focus class time on issues of violence and prevention.

Journalist Charles Kuralt will host the two national video conferences. At Mizzou, the video conferences will be held at noon on Feb. 6 and Feb. 9 in the Memorial Union Auditorium. Group discussions will follow the video presentations. The public forum will be held at 7 p.m. Feb. 6 in Gentry

Middle School's cafetorium and features Katie Hart, a Georgia social worker and national speaker on violence in schools. Community leaders, students and others will take part in a panel discussion following Hart's remarks.

MIRACLE OF ART

Works of art will benefit the health of children in mid-Missouri at the 10th annual art auction for the Children's Miracle Network on Saturday, Feb. 3.

The art will be on display at 6 p.m. in the Ellis Fischel main lobby. The auction begins at 7 p.m.

Council discusses plans Nominations for for recognition week

ven though Staff Recognition Week is nearly three months away, the lineup of events slated for April 15 through 19 was one of the main orders of business at Staff Advisory Council's Jan.

25 meeting. This year's theme, "Better Through Teamwork," serves as an encouragement for staff to work together to make MU a better institution, says Kimberly Hicks, a member of the council.

882-4568

Attention Retirees:

Our office is looking for energetic individuals to work 8 a.m. to 12 p.m. If interested, contact Susan Hamilton at 882-4568.

"We cannot do it without each other; it takes cooperation and teamwork," she says.

The highlight of the week is the ceremony honoring winners of the Chancellor's Outstanding Staff Award, which carries a \$1,000 prize. Four staff members, one from each of the job classifications

administrative/professional, crafts/maintenance, secretarial/clerical and technical/paraprofessional - will be recognized April 15 for their outstanding efforts.

Two other awards will be presented at the ceremony. They are the Barbara S. Uehling Award for Administrative Excellence, given to an administrator who has improved working conditions and the quality of life for staff; and the Mick Deaver Memorial Award, which honors staff members who cultivate good relations with students. Both carry \$500 stipends. Uehling is a former MU chancellor, and Deaver, killed in an automobile accident in 1980, was associate director of the University Police Department.

Nomination forms have been sent to staff and faculty, with the deadline set for noon Feb. 9. Anyone who misplaced or did not receive a form should call Darlene Schroeder, council secretary, at 882-4269.

In other business the council

Discussed the upcoming staff benefits open forum to be held from 11:30 a.m. to 1 p.m. Feb. 28 in S203 Memorial Union. Bring your lunch; beverages will be provided.

Representatives from Human Resource Services, and Faculty and Staff Benefits will be on hand to answer questions. Topics sure to be discussed are the HMO and POS health-care plans, retirement benefits and educational assistance, says Donna Taylor-Stearns, council chairwoman.

Panelists include Ken Hutchinson, associate vice president of the University of Missouri System's Human Resource Services office; Mike Paden, director of the Faculty and Staff Benefits office; Karen Touzeau, assistant vice chancellor for affirmative action and MU's Human Resource

outstanding staff awards accepted through noon Feb. 9

Services office; Lisa Wimmenauer, staff representative to the UM staff benefits and retirement committee and an associate director of MU's Business Services office; and Kee W. Groshong, vice chancellor for Administrative Services.

Staff may submit questions or topics for discussion ahead of time to

Schroeder at 319 Jesse Hall. Announced that the inaugural issue of its newsletter, Staff Advisory Council Update, will be mailed within the next week or two to all benefit-eligible employees on campus and at University Hospitals and Clinics.

Communication is a goal that the council sets each fall, Taylor-Stearns says. "We believe that a newsletter is one means of keeping staff informed about council activities, staff concerns and campus issues."

Ready for the next century

"A Great Victory" read a headline in the *Columbia Missouri Statesman*, way back in 1870. The editors were talking about a bill the Missouri General Assembly had just passed authorizing a new college of agriculture at Mizzou, the first of its kind west of the Mississippi River. "Columbia now is in reality the Oxford of the West," the newspaper went on to boast.

The Board of Curators named George C. Swallow as professor of agriculture in 1870 and appointed him dean of the College of Agriculture in 1872. The first class in the college had only six students. Now there are 2,000 undergraduates and 400 graduate students. The college's 223 faculty teach in 15 academic programs. Looking back, it has been a great victory indeed.

WHAT'S DIFFERENT ABOUT CAMPUS COMPUTING?

PROBLEMS WE'RE SOLVING. . .

As many faculty, staff and students are already aware, connecting to the University system via modem can be very difficult. Problems like unreliable connections, busy signals, abuse of the system, and lack of space for our modems is compounded by the sheer num-

ber of calls we handle

e a c h day. Last winter,

Campus Computing's modem pool handled an average

2600 calls each day, and last fall that number grew to approximately 5300 calls per day. During this past intersession (when the number of calls usually drops significantly) we counted 4800 calls per day! The numbers continue to grow. We expect over 8500 calls each day during winter semester.

The steps we are taking to improve dial-in access serve are outlined below:

RELIABLE CONNECTIONS

One major problem we are working on is isolating and fixing the machines that prematurely hang up on people. At present, we are working to identify the actual source of the problem. As we implement changes, we will do our best to keep interruptions to a minimum.

BUSY SIGNALS

Probably all of you who have used our dial-up system one time or another have experienced busy signals when trying to connect to the system. As mentioned earlier, we expect over 8500 calls per day this semester alone, and the busiest times are from 4pm to 3am, and we encourage people to avoid connecting during peak hours. In early February, we will install 48 more high speed modems.

Two new specialized modem pools will also be created at that time. The "Express" modem

pool will be set aside for sessions of 30 minutes or less. This is

designed for people who wish to con-

nect, read their mail, and disconnect. A second set of modems will become the "Faculty-Staff" modem pool.

ABUSE OF THE SYSTEM

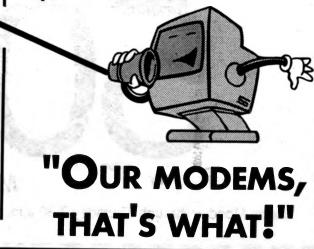

Another troubling problem for all of us is abuse of the system by individuals connecting via modem. People have remained connected to the SLIP system for very long periods of time, effectively monopolizing a phone line. In order to prevent individuals from connecting for extended periods of time, we have instituted a 10-hour limit on all calls to the general modem pool. No warning message will be given prior to disconnecting users who are dialed-up for longer than 10 hours.

CLAUSTROPHOBIC MODEMS

The modem pool needs more room! Currently, the modems are kept in a location that is too small for the number of modems that we have, and is too warm to properly store the hardware. The new location, also in the Telecomm Building, has more adequate climatecontrol systems and room for future expansion. The modems will be moved to their new location over a weekend in early February.

legislators

From page 1

"There is some concern in my mind that in an election year there could be an effort to turn the idea of spending money of any kind into some sort of partisan issue," the speaker added. "I have not heard those rumblings yet and I hope it doesn't occur. I think there is a great opportunity this year to move higher education forward; it's just vital to the state's interest to invest in higher education."

Rep. Harlan agreed that the budget plan stands a good chance of passing, "particularly because of the efforts by Chancellor Kiesler and the governor to make it clear that higher education is an investment that pays dividends for the state. The chancellor does a good job of making it clear to the General Assembly that on this campus we are accountable."

Although Carnahan's budget recommendation has Rep. Backer's support, she warned that the higher education community must continue to get out its message. A robust state economy has triggered mandatory tax refunds under the Hancock Amendment, she said, and some voters might not understand why large funding increases are needed for some programs. "We're sending a lot of mixed signals that John Q. Citizen is not going to understand," Backer said. "There may be some explaining to do."

Moseley was even more enthusiastic about the budget. "It looks pretty good in the House, it looks great in the Senate," he said. "Higher education in general is viewed very favorably. With MU specifically, the only down side I see is jealousy. Legislators from other areas of the state with institutions that don't have MU's reputation believe they don't get enough of the funding pie," Moseley said. "We're not going to be able to overcome that jealousy, and I think we want to be in a position that they are jealous of us."

Moseley and others on the panel raised one note of caution. Some legislators, they said, are concerned about the recently approved tuition increase that will help fund the final year of the University's five-year plan. The tuition increases have helped meet the goals of improving faculty salaries, taking care of deferred maintenance on buildings, and funding increases for libraries and technology.

"Some legislators are concerned about raising tuition that much in a year when we're putting this much extra money in the University," Moseley said. "I realize a lot of it is one-time money, but this is an election year and saying that you want to save money for the kids back in your district is going to sound pretty good."

The panel also discussed the University's recent efforts to develop an enrollment management policy for the four campuses. Rep. Jacob applauded Chancellor Kiesler's position that the issue be debated around the state.

"That's absolutely essential," Jacob said. "My own view is that the doors of opportunity ought to be open to any student who wants to come here. Obviously, there's limited capacity and I don't think there's anything wrong with taking those who have the best credentials first. But I think we should work toward making this institution open to all students. Let's let kids come here and give it a try; if they don't make it, so be it."

Rep. Farnen admitted to mixed feelings on the issue. "On the one hand this is a public land-grant university and making it into a school where we turn away thousands of kids each year, I'm not sure that was the original intent," Farnen said. "But then again, as we have increased admissions standards and the quality of the programs by doing such things as niche planning, the applications have increased.

"I'm divided on this; it's something I haven't resolved for myself. I know the curators will have a tough time drawing that line as to how elite we want to become while still serving that land-grant mission."

Gaw said "a decision has to be made about the concept of allowing this institution to grow." But he warned that adequate funding is a key to any expansion.

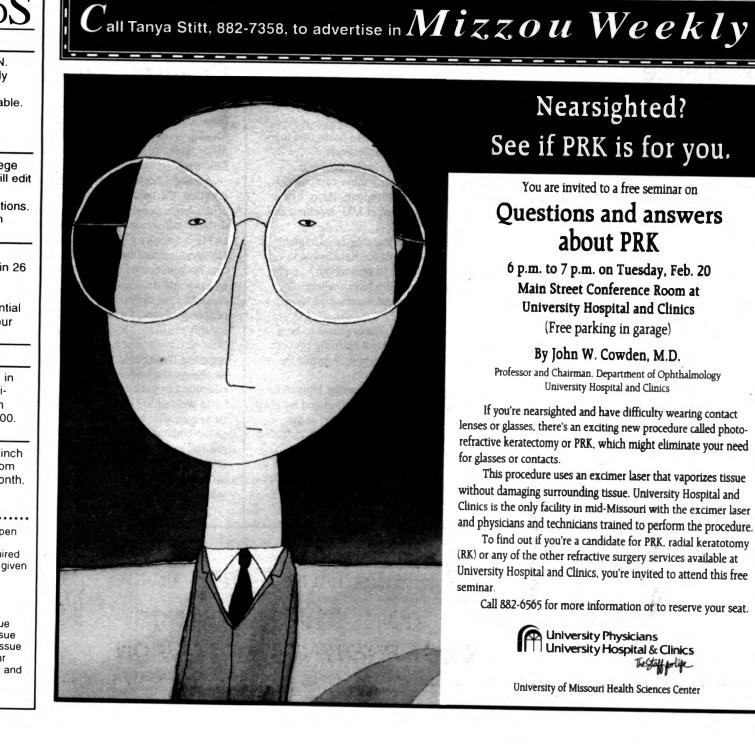

"If you allow your numbers to increase without knowing the appropriation will be there to support that, you're going to have less money per student and your quality will suffer as a result. We don't want that to occur," Gaw said.

"If we're going to have the concept that this is the place where students have a right to go if they graduate in Missouri, we have to increase the funding to allow that to occur. That concept, that idea has to be sold to the legislature."

Gaw also called for a better overall method for dealing with the state's higher education efforts. "We do not have enough coordination to be efficient in the way we spend our dollars," Gaw said. "We have a lot of duplication around the state and we need to do a better job of that. I think we have to start talking about that."

The lawmakers were unanimous on one point. Mizzou's grass-roots lobbying efforts by alumni and supporters in lawmakers' home districts are extremely important and very effective. "The most important thing legislators hear during the day is what they hear from constituents," Gaw said, and the speaker urged MU supporters to build long-term relationships with legislators. "I think that's been done to a great extent," he said.

Backer agreed: "You've got your choir members singing to us now."

Recognizing multicultural commitment

Vice Provost KC Morrison receives special recognition for service along with Chancellor Charles Kiesler, during Columbia's Martin Luther King Jr. birthday program on Jan. 15. Sarah Belle Jackson, right, of the local King celebration association, made the presentation, and Arvarh Strickland, left, retired professor of history at MU, was master of ceremonies.

TIME IS TICKING AWAY, but there are a few tocks left on the clock, so hurry and RVSP for some of the activities surrounding MU's founding celebration Feb. 7. Call 882-6611 to reserve a place in line at the birthday reception from 4:30 to 6:30 p.m. in the Great Room at the Donald W. Reynolds Alumni and Visitor Center. Call the same number by Feb. 6 to enter your office in the Time of the Tiger decorating contest or to order your Time of The Tiger T-Shirt. The party is free and open to everyone, and radio station KFRU (1400 AM) will broadcast live from the birthday bash. LOOKING FOR A GOOD WAY to promote your

for Excellence in Teaching and what they would like us to become," he says. "I also want faculty to have a sense of ownership of the program." One way he would like to do that is by enlisting the aid of faculty associates to help create and work on program projects.

"One of the things that attracted me to MU was the institutional interest in teaching enhancement," Groccia says. "In addition to our program, there are many other campuswide and department-specific efforts to enhance the learning experience for students. Also, I have been very impressed with the faculty concern for student learning. Here at MU, teaching and learning really matter."

Since so many good seminars and presentations on improving the learning environment are occurring all across campus, Groccia would like to see the Program for Excellence in Teaching become a clearinghouse for those activities. "We would like to provide an information center where instructors can find out what is going on and a haven where communities of instructors can come together to talk about teaching and learning on campus," he says.

"I chose to come here because of the feeling I had about this place. There seems to be a positive energy at MU in continually moving toward enhancing the student learning process. I'm excited and pleased to be here and I hope I can contribute to the efforts to improve the teaching and learning environment."

Groccia earned a doctorate in educational and counseling psychology from the University of Tennessee-Knoxville. At Worcester, he directed a faculty development program and taught various psychology courses. He has run student counseling programs at Worcester, at the State University of New York-Potsdam and at the University of Tennessee-Nashville.

His long experience with student learning issues prompted him to write *The College* Success Book: A Whole Student Approach to Academic Excellence, a study skills book with a holistic approach to learning. At MU, Groccia will continue his teaching career as an adjunct associate professor of psychology.

Charlson named associate provost

laine Charlson, associate dean of the College of Engineering, has been named associate provost at MU, effective Feb. 1. The associate provost position represents a reconfiguration of duties in the provost's office, some of which have been held by retiring assistant provost Jo Behymer.

Among Charlson's responsibilities will be the undergraduate assessment program, the faculty grievance process, faculty awards coordination, review of academic programs and the identification of technological needs for distance education. She also will serve as a liaison with organizations such as MU's Faculty Council, the Mid-Missouri Association of Colleges and Universities, and the Coordinating Board for Higher Education.

Charlson comes to the position with more than three years' experience as an associate dean and 15 years' experience at MU. She was the consensus candidate for the position, said Provost Ed Sheridan. "I talked to a lot of people — deans, faculty and others — about who might be a good candidate for this position," Sheridan said. "Everyone said, 'Talk to Elaine Charlson.' "Elaine Charlson is nationally known in her profession, and she is well regarded throughout this campus," Sheridan said. "She sees the breadth of situations and understands the big picture, both at MU and in higher education in general."

In welcoming Charlson to his staff, Sheridan also praised the services of Behymer, who has been at MU for 25 years. "Jo Behymer is very dedicated to the University," he said. "She is honest, committed and insightful, and she has a great sense of humor in difficult times, while treating complex issues with the amount of respect they deserve." Behymer will continue serving the University after her retirement on a consulting basis, the provost said.
