## Celebrating service

### COMMUNITY COMMITMENT

Max Miller, Gary Smith win retiree of the year awards for 2007

**M**ore than 600 MU faculty and staff retirees gathered in the Hearnes Center April 30 to celebrate their years of service to the University and get reacquainted with former colleagues. The annual event is a time to catch up on the activities of old friends and co-workers, rehash a few stories about the good old days and enjoy a tasty lunch.

The luncheon also is a time to honor two retirees, one a faculty member and the other a staff member, for their activities during retirement. Max L. Miller, who retired in 1994 from Extension/4-H Youth Programs, received the faculty retiree award. Gary Smith, who retired in 2000 as director of admissions and registrar, received the staff retiree award.

Since retiring, Miller has volunteered extensively with Habitat for Humanity and received the 1,000-hours of service award from the group last year. Miller also volunteers with the Boone Electric

Community Trust, belongs to the Columbia Downtown Optimist Club and co-manages that group's Christmas tree lot. He also works with the Show-Me State Games, is active in the Community United Methodist Church, Rainbow House, Camp Hickory Hill Diabetic Camp and state and local 4-H programs.

Smith has been described as "the go-to guy" who serves tirelessly across a spectrum of community and University life. Since his retirement, Smith has continued to serve such organizations as the Alzheimer's Association, Boone County Cancer Society board, Boone County Historical Society, Boy Scouts of America, United Way and the Columbia Kiwanis Club. At MU, he is a member of the campus campaign leadership team for the All We Call Mizzou campaign, the Jefferson Club board of trustees, MU Retirees Association and the University Club board.

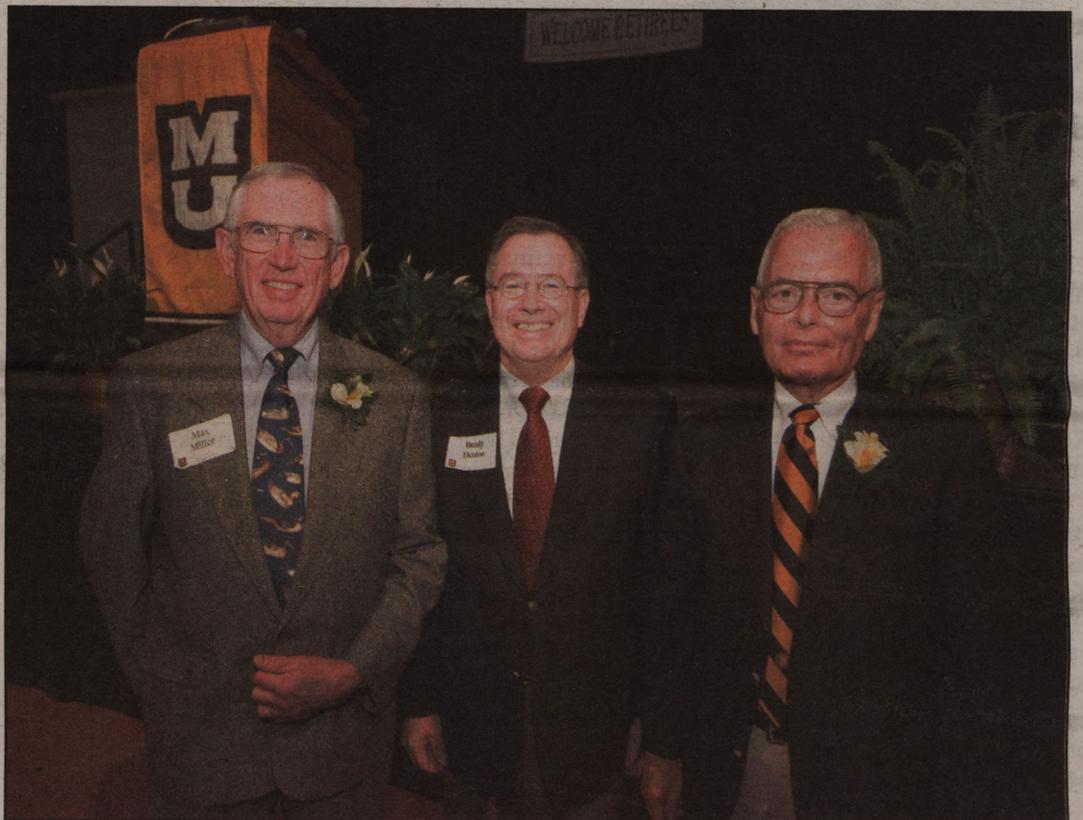

One highlight of the luncheon gathering was a viewing of a new MU promotional DVD, *The Mizzou Story*. Chancellor Brady Deaton applauded the retirees for their

many years of service to the University. "You are the Mizzou story," Deaton told the group. "This is what you've built. You have contributed so much in the life of this university. It's wonderful to see the ongoing commitments you make."

Those long-term contributions by retirees were underscored by an announcement that retirees had contributed a record-setting amount — \$1,097,257 — to the For All We Call Mizzou campaign over a nine-month period that ended March 31. Since the campaign began in January 2000, retirees have contributed more than \$23

million of the \$30 million raised in the It's My Mizzou campaign, the faculty, staff and retiree portion of MU's \$1 billion campaign.

"It's My Mizzou is not only the name of the campaign, it's how we who work here feel about the University," Smith said.

**ACTIVE RETIREMENT** Max Miller, left, and Gary Smith, right, received the 2007 retirees of the year awards from Chancellor Brady Deaton at the annual retirees luncheon April 30. Rob Hill photo

## MU campus has a variety of resources to help students in crisis

### SAFE HAVEN

Faculty and staff can steer troubled students to the help they need

**T**he shooting deaths at Virginia Tech last month prompted many universities to take a hard look at their emergency plans and ask how a similar tragedy might be averted on their own campuses.

Mizzou also has been double-checking every aspect of its emergency preparedness plans — checking communication systems and response times, planning alternative communication strategies during an emergency,

and ensuring the coordination of all the departments responsible for campus safety.

Attention to those safety plans has been heightened since the Virginia Tech shootings, but emergency planning has been a priority at MU for a number of years, Chancellor Brady Deaton told the members of the Faculty Council at an April 19 meeting.

"Since 9/11, campus safety has taken on a heightened importance," he said.

Faculty and staff can also play an important role in campus safety. If they notice disturbing changes in a student's behavior, they can contact a number of programs on campus that can help:

- MU Counseling Center, 882-6601
- Student Health Center, 882-7481
- MU Women's Center, 882-6621
- Wellness Resources Center, 882-4634
- Psychological Services Clinic, 882-4677

"Because faculty and staff see students on a regular basis, they may notice changes in behavior, such as changes in attendance or disruptive behavior in class. All those things could be signs of something else happening in a student's life, and it could be a good idea to get some advice about what to do next," says Cathy Scroggs, vice

chancellor of Student Affairs.

Some warning signs of distress include dramatic changes in classroom performance or attendance, skipping class or falling asleep in class, complaints from other students, changes in personal hygiene, irritability or aggressiveness, evidence of substance abuse and expressing suicidal thoughts

"If faculty and staff are concerned about a student or maybe they aren't sure how to intervene with a student in their classroom, they can call and consult with us. We can walk them through the steps they can take," says Anne Meyer, a licensed psychologist

who is interim coordinator for programming, consultation and communication at the MU Counseling Center.

She says it's not at all unusual for faculty, staff, parents and other interested persons to get in touch with the Counseling Center to learn how they can help students they feel are in distress. "I don't know if all faculty and staff are aware of our services, but we are there for them," Meyer says.

The center offers students a number of options. They can make an appointment to talk to one of the center's staff of licensed psychologists and other mental health providers.

**SEE Crisis on Page 5**

**An 'unfinished journey'**

When former U.S. Sen. Tom Eagleton died March 4, he left behind a poignant message for his friends and relatives: "So go forth in love and peace — be kind to dogs — and vote Democratic."

He also left behind a detailed record of his nearly half-century of public service. Eagleton's papers, housed at the Western Historical Manuscripts Collection at MU, are a treasure trove for historians and other researchers. The rich collection includes correspondence, photographs, speeches and

press releases, microfilm and newspaper clippings that span his political career as circuit attorney for St. Louis in 1956 to his three terms as U.S. senator from 1969 to 1986.

"I hope my papers will be of some use in the scholarly task of understanding Missouri, the Democratic Party and the 'unfinished journey' we Americans are taking through the 20th century," he said when he donated the first materials in 1986.

"With over 400 linear feet of material and so many diverse topics, researchers can approach the Eagleton papers

from countless angles," says David Moore, the manuscript collection's associate director.

"The collection is an excellent source for studying late 20th-century topics, from local issues affecting Missouri to national and international affairs, such as U.S.-Soviet relations at the end of the Cold War."

A complete index of the Eagleton papers is available online at [umsystem.edu/whmc/invent/0674preinv.html](http://umsystem.edu/whmc/invent/0674preinv.html). The Western Historical Manuscripts Collection is home to the papers of other well-known Missouri politicians, including

Stuart Symington, Warren Hearnes, Jerry Litton and Edward Long. A complete list is at [www.umsystem.edu/whmc/tl-gov.html](http://www.umsystem.edu/whmc/tl-gov.html).

**Easing arthritis**

May is National Arthritis Month and a time when individuals and their families should be aware of misconceptions about the disease, says Karen Funkenbusch, director of the MU's AgrAbility program.

Arthritis is an inflammation of the joint that causes pain, stiffness and swelling. The disease affects one in five

American adults and is the leading cause of disability. Funkenbusch says many people believe the only way to control the pain is through the use of drugs.

While most people with arthritis will require at least some medication, other measures can provide pain relief. Applying heat to an arthritic joint before exercise can relieve pain and stiffness and reduce swelling, she says. Massage and relaxation techniques such as meditation also may relieve symptoms. "Don't give up exercise. Inactivity only breeds stiffness and degeneration," she says.

# New research center studies link between diabetes and cardiovascular disease

**ACADEMIC ARCHITECT**

Research will lead to life-saving advances

**T**homas W. and Joan F. Burns, who have served MU for more than 50 years, were recognized April 27 at the School of Medicine for their leadership and philanthropy. The school dedicated its Thomas W. and Joan F. Burns Center for Diabetes and Cardiovascular Research during a ribbon-cutting ceremony.

The center focuses on the deadly link between cardiovascular disease and diabetes, which together claim the lives of more than 15,000 Missourians each year. The linked diseases constitute one of the most pressing health problems for Missouri and the nation.

"MU is grateful for the many contributions Dr. and Mrs.

Burns have made to advance patient care, education and research at our University," says Chancellor Brady Deaton. "We predict that research conducted at the Thomas W. and Joan F. Burns Center will result in potentially lifesaving advances for the many patients with diabetes and cardiovascular disease."

The newly named research center contains laboratories recently constructed with a competitive construction grant from the National Institutes of Health. The center's leader is James Sowers, one of the nation's leading endocrinologists and the Thomas W. and Joan F. Burns Missouri Chair in Diabetology.

The Burnses are among the most generous supporters of MU and have provided significant gifts to the School of Medicine, Ellis Fischel

Cancer Center and other programs. They created three endowments to support faculty members focused on diabetes and cardiovascular research at the School of Medicine. Burns was one of the founding faculty members of MU's medical center, which opened in 1956. He also was one of the founding faculty members of MU's medical degree program, which graduated its first class in 1957.

"The Burnses' amazing generosity is accompanied by decades of devoted service to the MU School of Medicine," says William Crist, dean of medicine and a 1969 graduate of the medical school. "Like thousands of other medical students, I was privileged to be trained by Dr. Burns. Many of those students also followed Dr. Burns' example by pursuing careers at academic medical centers."

A pioneer in endocrinology, Burns contributed greatly to MU's national reputation in diabetes care, prevention, education and research.

The American College of Physicians, the largest internal medicine organization in the country, awarded him the title of master, which is the group's highest academic honor.

Burns was a key architect in establishing MU's Cosmopolitan International Diabetes and Endocrinology Center and served for many years as the center's founding director. As Missouri's only diabetes center outside of St. Louis and Kansas City, it has provided treatment to thousands of patients much closer to home.

"The Cosmopolitan International Diabetes and Endocrinology Center was MU's first private-public

partnership. It is a model of interaction between a state organization and a philanthropic civic organization, which together are able to accomplish something neither could do alone," Burns says. "I believe further philanthropic support for diabetes and cardiovascular research will allow MU to make even greater contributions to patient care, prevention and education."

# E-commerce economies

## SECURE SITE

University is contracting with private provider

Although each year brings more and more reports of identity theft and credit card fraud, most people are confident that their credit card transactions are safe and secure. That confidence comes at a cost, though. Businesses and organizations that process checks and credit card transactions electronically are required to meet strict security standards or face fines of hundreds of thousands of dollars.

Since 2000, the University has maintained a secure e-commerce service that is called the Mizzou Virtual Lockbox, or MVL system. That system made it easier for many MU departments to conduct business and other transactions — for instance, credit card sales at University Hospital gift shops, University Concert Series ticket purchases, payments for

sending student transcripts and student account payments.

The idea was to provide campus departments a safe and easy way to transact business with their clients. But the MVL system cost the University more than \$150,000 a year to operate, and it involved a number of security headaches: The secure computer servers had to be kept in a special, locked cabinet at the data center with strictly controlled access and a security camera trained on the cabinet at all times.

“Within the past year, we decided the University needs to get out of that business,” says Luci Fichter, project manager for the e-commerce implementation project at the Information Technology Division. The old system is being phased out and is being replaced by a commercial system called QuikPAY that a company called NelNet will provide.

The conversion will be completed by Oct. 1, says

Terry Robb, a spokesperson for Information Technology. “The University is not a bank,” Robb says. “We thought it

best that we outsource that to people who do this every day.”

As part of the change, the University has reviewed its former, mostly informal, policies for departments to request secure e-commerce services. Formal guidelines

have been established, and all requests must now be approved by the University treasurer’s office, Fichter says.

More information about the changes and the new policies are available online at [doit.missouri.edu/e-commerce](http://doit.missouri.edu/e-commerce).

# calendar

## Concerts & Plays

### Thursday, May 3

**ASIAN FILM SERIES:** The Vietnamese film *Buffalo Boy* will be shown from 7-10 p.m. in Memorial Union's Wrench Auditorium.

### Saturday, May 5

**UNIVERSITY CONCERT SERIES:** The Missoula Children's Theatre will present *Snow White and the Seven Dwarfs* at 2 and 7 p.m. in Jesse Auditorium. For ticket information, call 882-3781 or order online at [www.concertseries.org](http://www.concertseries.org).

## Conferences

### Friday, May 4

**FAMILY MEDICINE CONFERENCE:** The Family Medicine Update Conference will begin at 7 p.m. at the Peachtree Banquet Center and continue tomorrow. For more information, contact Shirley Walters at 882-0366 or go to [www.muhealth.org/~cme](http://www.muhealth.org/~cme).

### Friday, May 18

**MEDICAL EDUCATION CONFERENCE:** The Pediatric Office Dermatology Conference will begin at 8 a.m. today in the Reynolds Alumni Center and continue tomorrow. For more information, call Shirley Walters at 882-0366 or visit [www.muhealth.org/~cmc](http://www.muhealth.org/~cmc).

## Courses & Workshops

### Sunday, May 6

**MUSEUM WORKSHOP:** "Mummy's Day," an art

experience for children in grades K-8 and accompanying adults, will be held from 1:30-3 p.m. in the Museum of Art and Archaeology in Pickard Hall.

### Monday, May 7

**COMPUTER TRAINING:**

- "Excel 2003 for Starters" will be offered at 1 p.m. in N3 Memorial Union.
- "PHP Essentials" will be offered at 10 a.m. in 215 Telecom Building.

Registration is required; call 882-2000 or register online at [training.missouri.edu](http://training.missouri.edu).

### Monday, May 7

**COMPUTER TRAINING:**

- "InDesign CS2: Advance Typography, Tables & Long Documents" will be offered at 1 p.m. in N3 Memorial Union.
- "Creating Web Pages" will be offered at 8:30 a.m. in N3 Memorial Union.
- "Page Layout with Cascading Style Sheets" will be offered at 8:30 a.m. in 4D11 East Ellis Library.

Registration is required; call 882-2000 or register online at [training.missouri.edu](http://training.missouri.edu).

### Tuesday, May 8

**COMPUTER TRAINING:**

- "Access 2003 Customizations, Indexing & Replication" will be offered at 1 p.m. in 4D11 East Ellis Library.
- "Collaborate MU/SharePoint Foundations" will be offered at 1 p.m. in N3 Memorial Union.
- "Flash 8.2: Layers and Animation" will be offered at 8:30 a.m. in N3 Memorial Union.

Registration is required; call 882-2000 or register online at [training.missouri.edu](http://training.missouri.edu).

### Wednesday, May 9

**COMPUTER TRAINING:**

- "Excel 2003 Function Fun" will be offered at 1 p.m. in 4D11 East Ellis Library.
- "Photoshop CS2: Colors, Masks, & Saving for the Web" will be offered at 1 p.m. in N3 Memorial Union.
- "Taking Control of Your Calendar with Outlook" will be offered at 8:30 a.m. in 4D11 East Ellis Library.

Registration is required; call 882-2000 or register online at [training.missouri.edu](http://training.missouri.edu).

### Thursday, May 10

**COMPUTER TRAINING:** "Illustrator CS2.2 Layers, Text & Colors" will be offered at 8:30 a.m. in N3 Memorial Union. Registration is required; call 882-2000 or register online at [training.missouri.edu](http://training.missouri.edu).

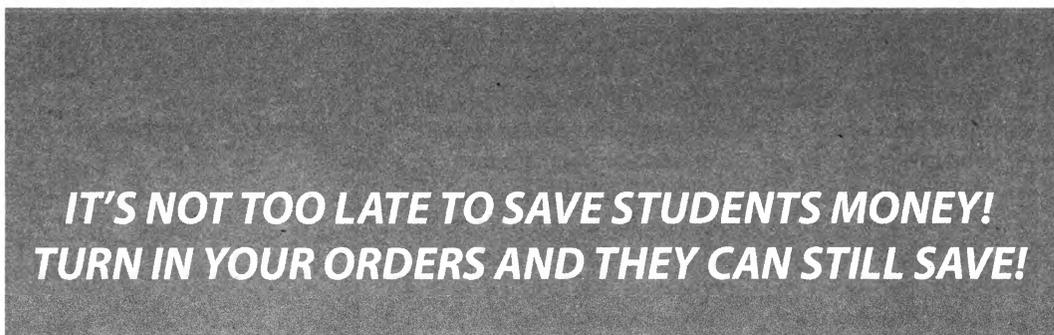

## Exhibits

**MUSEUM OF ART & ARCHAEOLOGY:** "Final Farewell: The Culture of Death and the Afterlife," explores cross-cultural themes of the afterlife and

their impact on art. The museum, located in Pickard Hall, is open from 9 a.m.-4 p.m. Tuesday-Friday and from noon-4 p.m. Saturday and Sunday.

**STATE HISTORICAL SOCIETY:**

- "Light & Life in Missouri: Photos by Notley Hawkins" will be on display through May 12 in the north-south corridor gallery.
- "The Stories They Tell: Understanding Missouri History Through Maps," an exhibit of more than 30 maps organized by Walter

**CRISIS from Page 1**

The center is available for students in crisis. "If a student is in crisis, we always have a clinician on call during business hours," Meyer says.

The Counseling Center's Web site contains a detailed guide that explains how MU employees can steer students in distress to the help they need. That guide, and links to information about other Counseling Center programs and services, is

online at: [counseling.missouri.edu/distressed-students](http://counseling.missouri.edu/distressed-students).

The Counseling Center also provides programs and workshops on mental health topics to all University organizations and groups. Meyer asks faculty and staff who would like to schedule a training session, or who have suggestions about what training topics should be covered, to e-mail her at [meyeran@missouri.edu](mailto:meyeran@missouri.edu).

The Student Health Center

is another option for faculty and staff who are concerned about the well-being of a student. In addition to physicians, the health center staff includes psychologists and psychiatrists, says Susan Even, the health center's director and a family medicine physician.

Faculty and staff often have direct, daily contact with students and can notice even subtle changes in behavior, Even says. "Their relationship with students is such that

they may have a comfortable way to say to them, 'You know, I'm concerned about you because I've noticed these changes in you.'"

A faculty member might not be sure about whether the problem involves a medical condition or a mental health concern. A physician at the Student Health Center can help perform a medical assessment that can steer a student to the help that she or he needs. The center also offers a number of

programs that educate students about healthy behaviors. More information about those programs is available online at [studenthealth.missouri.edu](http://studenthealth.missouri.edu).

"We want to be a resource for the campus," Even says. "We feel that we are a part of the educational mission of the University, and a big part of that mission is student success. Students have to be healthy to be successful."

**CALENDAR from Page 4**

Schroeder, associate professor emeritus of geography, is on display through June 30 in the main gallery.

**BINGHAM GALLERY:**

The work of two master's candidates in fine arts will be on display through May 24: "A Man Ain't Nothin' But a Man" by Eric Carlson and "An Absurd Beauty" by Amanda Salov. A reception will be held from 4-7 p.m. May 12.

**Lectures & Seminars**

**Thursday, May**

**INTERNATIONAL**

**AFFAIRS SEMINAR:**

David O'Brien, professor of rural sociology, and Valery Patsiorkovsky, professor and laboratory chief for the Institute of Socio-Economic Studies of Population at the Russian Academy of Science in Moscow, will present "Changes in the Real World of Russia" at a brown-bag seminar at noon in S203 Memorial Union.

**Friday, May 4**

**CAMBIO CENTER**

**SEMINAR:** Marjorie Sable, associate professor of social work and associate research dean for human environmental sciences, will present "Improving Family Planning Outreach and Services: Lessons Learned" at a brown-bag seminar at noon in 301 Gentry Hall.

**ART & ARCHAEOLOGY**

**LECTURE:** Lanny Bell, adjunct professor of Egyptology and ancient Western studies at Brown University, will present "Pyramids, Mummies and Magic: the Search for Immortality in Ancient Egypt" at 6 p.m. in 106 Pickard Hall. A reception will take place at 5:30 p.m. in the Cast Gallery.

**Wednesday, May 9**

**MATHEMATICS LECTURE:**

Field Medal winner Sir Michael Atiyah will present "Mathematics: Invention or Discovery?" at 4 p.m. in Cornell Hall Auditorium. A reception will follow at 5 p.m. in Reynolds Alumni Center.

**Meetings**

**Thursday, May 10**

**STAFF COUNCIL:** The Staff Advisory Council will meet at 1:15 p.m. today in S204 Memorial Union.

**2006-07 Excellence in Tutoring Awardees**

The Excellence in Tutoring Award is presented to those tutors who have demonstrated outstanding commitment to student success at MU. The award was established in 1993. Tutors who receive this award have distinguished themselves by their exceptional commitment to students, innovative ideas, and enthusiasm for learning.

# MU units adopt summer hours

**B**eginning Monday, May 14, the units listed here will move to summer hours. Summer hours are from 7:30 a.m. to 4 p.m. with 30 minutes for lunch. Regular hours will resume Monday, Aug. 6. Some of the offices observing summer hours will maintain telephone coverage until 5 p.m. or later. Offices not listed here will retain the regular work schedule of 8 a.m. to 5 p.m. with an hour for lunch. Some campus units — such as Campus Facilities — maintain a different work schedule year-round.

## Mizzou is in the running for national biodefense lab

### SECURE SITE

Federal officials will tour location next week

**A** 100-acre site in Columbia has been named as one of 17 sites in the country competing for the opportunity to host a federal research facility that will study non-native animal diseases and other pathogens.

The facility, known as the National Bio- and Agro-Defense Facility, would be located on a 100-acre parcel of land north of New Haven Road. Federal officials from

the Department of Homeland Security (DHS) will visit May 10 and 11 to view the site and examine the proposal with the MU consortium. Originally, 28 sites were proposed. The proposed facility and the supporting businesses that will result offer unparalleled economic development opportunities, says Jim Coleman, vice chancellor for research. "New scientists coming to Columbia will give opportunities for new research and experiences for our graduate and undergraduate

students. There also is a major medical advantage to this facility." Coleman says the new cadre of scientists that will be attracted to the facility will put MU at the forefront of finding cures for various agricultural diseases and diseases that might pass from animals to humans. MU officials are leading a consortium that submitted a letter of intent proposing the site in late March 2006. When completed, the facility will be approximately 500,000 square feet and employ about 250 scientists and support

personnel. Construction costs are estimated to be \$450 million. The remaining 17 sites will be narrowed to three to five sites this summer.

The Department of Homeland Security plans to announce the final site selection in October 2008, and the facility should be operational by 2014.

## 2007 Kemper teaching award winners

**Fran Arbaugh**  
Assistant Professor  
Mathematics Education  
College of Education

**F**ran Arbaugh is dedicated to helping teachers understand and extend their students' mathematical thinking and reasoning.

Her research focuses on mathematics teachers' learning, especially in professional development projects, and contexts of learning, through vehicles such as teacher study groups, types of curriculum and college courses. Her work has been published in various journals, including *The Journal of Mathematics Teacher Education and Teaching Children Mathematics*.

Arbaugh teaches a variety of undergraduate and graduate courses for middle school through college level teachers. Her focus is on preparing middle and secondary school mathematics teachers, but she also has pioneered efforts within the learning, teaching and curriculum department to mentor graduate students in the area of college teaching. She routinely engages mathematics education doctoral students in preparation and instruction of undergraduate classes, helping them organize syllabi, select instructional resources and tasks, and develop assessments.

Arbaugh is regarded by students as a demanding but accessible instructor. Students praise her for her ability to organize instruction, stimulate reflection and inspire a love of mathematics. She is described as "masterful in crafting activities that would encourage prospective teachers to think deeply about the importance of student understanding."

One former student said, "Fran Arbaugh has a way of bringing out the best in math teachers. She takes my thinking and teaching to levels above what I think I can do, and it's always with a question."

**R. Wilson Freyermuth**  
John D. Lawson  
Professor of Law  
School of Law

**A** national expert in the area of property law, R. Wilson Freyermuth joined the law faculty in 1992 and teaches in the areas of property, real estate, secured transactions and local government.

"Professor Freyermuth is a versatile teacher who is able to reach different groups of students in these different courses and who effectively conveys both the subject matter in question and his passion and respect for the subject matter," says R. Lawrence Dessem, dean and professor of law.

While legal academia has been slow to embrace technology in the classroom, Freyermuth routinely integrates it into his teaching through the use of PowerPoint, e-mail, blogging, smart board, video technology and the Web. He was named by the Center for Computer-Assisted Legal Instruction (CALI) as its property fellow in 2000. The computer-based learning exercises that he created for CALI have been distributed nationally and are used at law schools across the country. Additionally, the textbook he co-wrote titled *Property and Lawyering* also is used nationally.

The MU School of Law has recognized his achievements in the classroom and awarded him the Blackwell Sanders Peper Martin Distinguished Faculty Achievement Award. He also was named the Phi Alpha Delta Teacher of the Year.

Outside of the academic setting, Freyermuth is just as generous with his time. He makes a concerted effort to get to know his students personally, often inviting small groups of students to join him for lunch or coffee.

**Lois Huneycutt**  
Associate Professor  
History  
College of Arts and Science

**S**tudents in Lois Huneycutt's medieval history classes typically write off past individuals, their ideas and concerns as barbaric or backward and less capable of abstract thought than modern people.

Getting students to identify with people of the past whose lives, experiences, assumptions and expectations were different from their own can be a painful task because they will not always be comfortable confronting alien ideas and beliefs. However, Huneycutt believes that challenging students to confront these differences will lead them to listen to and empathize with people who are different from themselves — skills that will serve them all their lives.

In efforts to make her classrooms places where students feel comfortable interacting with each other and with her, Huneycutt employs a mixture of teaching techniques such as assigning group and individual projects that include oral reports, in-class debate and role-playing exercises in which students take on personae of people in the past.

For Huneycutt, teaching and learning do not stop in the classroom. She urges students to take advantage of outside lectures and events and encourages students to present their research at professional conferences. She often shares her expertise in the community.

"Continued enthusiastic participation in this broad community of learning, both inside and outside of the classroom, illustrates my teaching and learning philosophy and defines who I am as a scholar and a teacher," Huneycutt says.

**Lynda Kraxberger**  
Associate Professor  
Convergence Journalism  
School of Journalism

**L**Lynda Kraxberger's willingness to adopt new teaching strategies is what distinguishes her from being a good teacher, who presents information and demonstrates ideas, to being a great teacher who inspires.

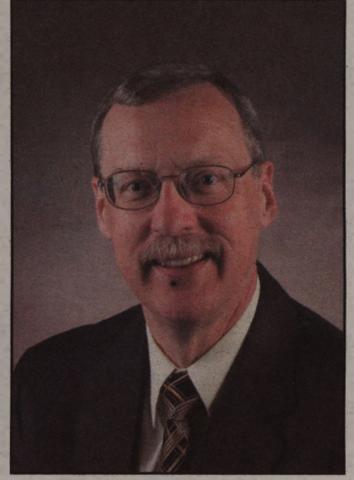

She joined the Missouri School of Journalism in 1993, where she oversaw the broadcast news portion of the curriculum at the NBC and CNN affiliate KOMU-TV, the only university-owned commercial television station in the United States that uses its newsroom as a working lab for students.

Seven years later, Kraxberger moved from the television station to the traditional classroom and began teaching Broadcast I. During the five years she taught the introductory course for radio-television journalism students, she never used the same syllabus twice, as her approach and subject matter changed constantly to adapt to changes in the field and in her students.

Kraxberger is a founding member of the school's newest sequence: convergence journalism, an emerging discipline of cross-media cooperation involving broadcast, print and the Web. With this assignment she has co-created and co-taught four new courses. This spring, the school graduates its first full class of undergraduate and master's students with degrees in convergence journalism.

"The sequence has been a challenge to Lynda, and she's meeting it with a first-one-in, last-one-out work ethic," says a colleague.

"In this rapidly changing world of technology, Lynda is working hard to stay at least one step ahead of the students, and that is no easy task," says her teaching assistant.

**Frank J. Schmidt**  
Professor of Biochemistry  
School of Medicine and  
College of Agriculture, Food  
and Natural Resources

**F**rank Schmidt guides students to become scientists in the classroom, to learn science by doing science.

To do this, he structures his classes to include models of the way science is done professionally. Scientists, he says, ask questions, gather existing knowledge, identify needed knowledge, find out information they need to know and test their ideas on something new.

He is known for his ability to cause students to think creatively, not only through his teaching methodologies but also through his evaluation process. He uses deductive reasoning, problem-solving examples from real-life applications and natural phenomena to reinforce learning and understanding. "The skills he has developed in his students will not only assist them in becoming successful researchers but also will carry them far in working in intellectually stimulating environments," a colleague says.

Schmidt led an interdisciplinary team of faculty members to develop and implement a two-course introductory science sequence for the MU Honors College. The courses were founded on principles of interdisciplinary and inquiry-based instruction and a "less is more" approach. As a result of his teaching of these classes, he was selected as the campus Honor College Professor of the Year in 2000.

"Dr. Schmidt's striking effectiveness as a teacher are his uncanny memory and brilliant ability to weave into his lectures stories that crystallize the central points of a lesson," a colleague says.

# Tiger treasures

## RAISING AWARENESS

Mizzou will host state's largest-ever rummage sale

Students filling dumpsters with items they no longer want may be history, thanks to Tiger Treasures, a new initiative aimed at getting students to see the value of recycling household goods.

Each spring, when students move from residence halls, fraternities and sororities, usable goods are thrown away. Not only are the materials wasted, but disposal is costly and some materials potentially pollute the environment when dumped in the landfill. Additionally, producing these goods has indirect costs such as energy use, pollution from mining and manufacturing, and energy and pollution produced from transporting them.

To help reduce pollution and costs, MU is planning the first-ever Tiger Treasures rummage sale scheduled for June 2 on the east side of Memorial

Stadium. Early risers can get dibs on the goods from 6 a.m. to 7 a.m. by paying a \$5 admission fee. The sale is free and open to the public from 7 a.m. to noon. Proceeds from the sale and early-bird admission fees go to the Salvation Army.

Tiger Treasures is modeled after programs at other universities and colleges across the nation. Penn State and Notre Dame, for example, have been doing it for several years, says Steve Burdic, Mizzou's recycling coordinator. He believes the Tiger Treasures rummage sale will rival any rummage sale held in the state of Missouri. "We are expecting to collect 30 tons of items, from appliances to wearable goods," he says. "This is a good way to keep these items out of the landfill, make them available to others and benefit the community economically. The program does a good job of raising awareness of recycling. This may be the

best thing that happens."

The communitywide event is co-sponsored by MU's campus facilities, intercollegiate athletics and residential life departments; city of Columbia; Salvation Army; United Way; Zimmer Radio Group; *Columbia Daily Tribune*; and KOMU-TV8.

Between May 1 and May 12, donation stations will be set up in or near residence hall lobbies for students to unload their unwanted, gently

used and new items. Burdic says all goods will be priced to sell and bargains will be comparable to those found at Salvation Army resale stores. Containers from local food banks will be available, too, for nonperishable foodstuff.

Volunteers are needed to collect, sort, price and sell the merchandise that this year is being collected exclusively from students residing on campus. "There is no such thing as enough volunteers,"

Burdic says. "We are expecting 5,000 people to attend the event and we'll need at least 400 volunteers from May 1 through end of sale on June 2."

For information on volunteering, go to the Tiger Treasures Web site at [www.cf.missouri.edu/tigertreasures](http://www.cf.missouri.edu/tigertreasures). With questions about the Tiger Treasures program, visit the Web site or call Burdic at 882-7287. His e-mail address is [burdics@missouri.edu](mailto:burdics@missouri.edu).

Jensen Moore turned in her Journalism textbook orders on-time last semester and saved her students

**\$444.05**

Dr. Constantine Brancovan turned in his History textbook orders in on-time last semester and saved his students

**\$1531.90**

Surya Mantrala turned in her textbook order on-time last semester and saved her students

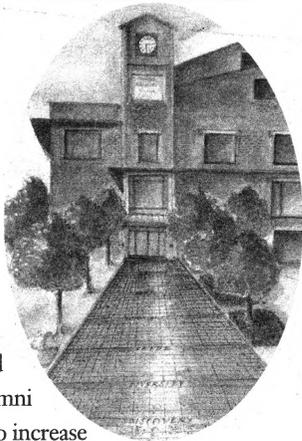

**\$4500.00**

On-time textbook orders save students money through increased buyback and used book availability. Please submit your Summer and Fall textbook orders today! Learn more at [mubookstore.com/faculty](http://mubookstore.com/faculty).

Congratulations to these faculty who were automatically entered into a random drawing last semester, along with every instructor who submitted an on-time textbook order. Dr. Brancovan won first place (\$250 University Bookstore Gift Certificate), Jensen Moore won second place (\$100), and Surya Mantrala won third place (\$50).

Mark your name in MU history.

## Mizzou Legacy Walk

Net proceeds of this project, located at the entrance of the Reynolds Alumni Center, will allow the Association to increase and expand the support of student scholarships.

Donors may purchase as many bricks as they wish and family, friends, and organizations may be grouped together. Reserve your spot on Mizzou Legacy Walk today and let future Tigers follow in your footsteps.

Contributions support the For All We Call Mizzou campaign. For more details look for "Mizzou Legacy Walk" on [www.mizzou.com](http://www.mizzou.com).

Brick pavers may be engraved with up to three lines of text. Bricks of friends/family may be grouped together. Installation of inaugural bricks tentatively scheduled for Summer 2007.
