INTRODUCTION

This booklet is the update to the 1972 edition of the Resource Directory of the State Department of Education. The purpose of such a directory is to provide information on available services in many different areas to persons living in Missouri. As the cover indicates the directory is mainly concerned with services for children although there are many listings of programs for adults as well. It is hoped that this directory will provide direction to school personnel and other organizations toward resources available outside their own institutions.

The organization of the directory has been altered somewhat from that of the 1972 edition. Organizations have been listed alphabetically. An alphabetical index is included in the front with a complete classified index at the end of the booklet.

As stated in the 1972 edition the inclusion of an organization in this directory does not imply endorsement nor does exclusion in any way imply disapproval.
